

HOW TO CONTACT OFFICIALS FOR FEEDBACK- GUIDANCE FOR COACHES

At the request of the coach, the referee or the technical controller can give the feedback at the earliest when the competition is over.

When the competition is over:

- check who you want to contact based on the feedback you would like to receive:
 - you can contact the Technical Controller asking for feedback about levels of difficulties in spins and steps.
 - you can contact the Referee asking for feedback about GOE and PCS.
- check who was the referee and/or the technical controller under the competition in question (you can find this information in the tab *officials* at the competition's schedule)
- decide if you want to contact them directly or via email
- **If directly:**
 - make sure officials are not busy before you approach them

- ask for feedback about specific element by mentioning skater, category and segment (short or free)
- If via email:
 - check the email address in the following document
 - send an email specifying the skater, category, the segment (short or free) and the element in question
 - be sure to provide ethical language and the right tone of expression

Before the competition:

- Officials may not give feedback to the athlete the same week that the skater is to attend the event.
- Officials should not give feedback to any skater 3 weeks before the competition, if they are to judge them
- Officials can be contacted by the coaches until 3 weeks before the competition, if they have any question/doubt about any element
